TECHNICAL SUPPORT ENGINEER | APIs, SQL & Production Debugging

SUMMARY

Technical Support Engineer, 5 years in remote-first SaaS and fintech. Top ticket solver at Deel in Q2 2026, resolving 80% of escalations without Engineering across 300+ tickets a month at 97% SLA. Saved Bolt €120,000 a year by tracing the top billing complaint to its root cause and getting a self-service fix shipped. Debugs production issues with SQL, REST APIs and observability tooling, and built an AI agent that investigates tickets before work starts.

SKILLS AND TOOLS

AI & Automation: AI agent design and deployment (Akai by Deel), prompt and workflow iteration, LLM tooling, Zapier

Languages & Web: JavaScript, SQL, HTML, CSS

Databases & Data Warehousing: PostgreSQL, Amazon Redshift, Snowflake

APIs & Debugging: REST APIs, Postman, Webhooks, Chrome DevTools

Observability & Monitoring: Datadog, Looker

Systems & Development Tools: GitHub

Support & Workflow Tools: Zendesk, Jira, Slack

Core Competencies: Troubleshooting, Root Cause Analysis, Incident Management, SLA Ownership

WORK EXPERIENCE

DEEL

Feb 2023 - Present

Technical Support Engineer

- Ranked the top ticket solver on the technical support team in Q2 2026, resolving the highest volume of technical escalations across payroll, integrations, and API issues.
- Built an AI agent on Akai, Deel's agent platform, that investigates each newly assigned ticket and posts two independent proposed solutions before work starts, one from previously resolved tickets and one from Slack threads and internal documentation. In daily use on my own queue, with prompts and retrieval tuned against real ticket outcomes and a human review step before anything reaches a customer.
- Resolve 80% of escalated technical issues without Engineering assistance using Datadog, Postman, Chrome DevTools and SQL queries, reducing escalation backlog and improving team efficiency.
- Resolve 300+ technical tickets and escalations monthly via Jira and Slack across US and EMEA time zones, consistently maintaining 97% SLA compliance in a fully remote startup environment.
- Diagnose and troubleshoot complex platform issues across payroll, API integrations, fintech and core product workflows using analytical and debugging skills.
- Led Integration app version upgrades in partnership with Product and Engineering teams, improving customer adoption by 30% and eliminating recurring issues affecting 200+ customers.
- Trained 5 new Technical Support Engineers (3 in integrations, 2 in payroll) using custom documentation, achieving 100% probation pass rate and reducing onboarding time by 2 weeks vs. team average.
- Escalate intricate product defects to Engineering with detailed reproduction steps, log analysis, SQL queries, and documented hypotheses, accelerating fix turnaround.

BOLT

Feb 2021 - Feb 2023

Billing Support Specialist

Feb 2021 - Aug 2022

- Saved €120,000 a year by ranking billing complaints by volume in Looker and querying Amazon Redshift to trace the top recurring issue to tax filing deadlines across the markets Bolt operated in, which fall at different points in the year from country to country. Made the cost case to Product and an in-app self-service invoice feature shipped, cutting related tickets by 40%.
- Managed complex billing, payment, and card escalations by querying transaction data in Amazon Redshift and testing payment APIs via Postman, coordinating with third-party payment partners (Wise, Stripe) until resolution and maintaining 95%+ escalation closure rate.
- Reduced the Billing queue in Jira by 80% by identifying root causes of recurring support issues and creating 7 customer-facing and internal knowledge base documents.
- Built and monitored billing metrics and reports using SQL, Google Sheets and Looker to monitor and prevent irregular activities.

Customer Safety Specialist

Sept 2022 - Feb 2023

- Queried support data with SQL and visualized trends in Looker and Excel to identify recurring customer issues, collaborating weekly with cross-functional teams to implement friction-reducing product improvements.
- Created a training manual for foreign outsourced agents on our phone support software, trained and onboarded them successfully to increase the first-line phone support team by 80% while maintaining quality support.

- Managed customer safety concerns as primary point of contact across global markets, providing prompt responses via Zendesk with an average first response time of 1 hour, total response time of 8 hours, resolving an average of 60 queries a day at a customer satisfaction rate of 80% and above.
